LIGHT UP THE NIGHT!

The annual Winter Lights festival returns for the fifth year to transform the dark evenings at Canary Wharf into a spectacle of light, colour and movement. Twenty installations materialise around Canary Wharf as artists from around the world, working on the cutting edge of light art and technology, share their creativity and ingenuity.

This year sustainability, recycling and the environment is a theme running through the works. Many of the pieces have been created by reusing materials and others send out a strong message about waste and climate change.

Visit canarywharf.com to download a brochure with full details about the installations and a map to help guide you round the free exhibition. Alternatively, pick up a map from one of our stewards when you arrive at the event.

Be sure to visit Cabot Square which will be transformed into the Winter Lights hub with its illuminated fountain and array of food trucks serving up delicious dishes and warming drinks.

Please be aware that some installations have flashing lights.
